Faisal Khan

Sr. Software Engineer at Taazaa Inc.
Noida, Uttar Pradesh, India

Summary

Senior Angular & Frontend Engineer with 7+ years of experience building scalable, production-grade web applications across healthcare, luxury mobility, EdTech, and community platforms. My last 3 years have been exclusively focused on Angular architecture, NX monorepo ecosystems, and Signal-driven component design — leading frontend delivery at Taazaa Inc where I architect large-scale SPAs serving enterprise clients in the US healthcare industry. What I bring to a team: Angular (v8–21), NX Monorepo, NgRx, RxJS, Signals — from greenfield architecture to legacy migration. Storybook-driven component design systems adopted across multiple product teams. Cypress E2E test coverage (0% → 70% on critical flows), Jasmine/Jest unit testing. Technical leadership: code reviews, mentoring junior engineers, and defining team-wide coding standards. Full early-career MEAN stack background (Node.js, Express.js, MongoDB) — I make informed decisions across the stack. Projects I've shipped: • Taazaa Inc • Mar 2024 – Present # Leading frontend for • ForSite • — enterprise SPA powering ForTec Medical's 1,350+ surgical device operations across the USA • Angular 21 • NgRx 20 • Signals • SignalR • Sole FE engineer on • MARBLELIFE® Portal • — Angular 18 • Nx 19 • Signals-only • Docker • 7 roles • published Nx library • WebMobril Technologies • 2022 – 2024 • CaiDrive • — Luxury hypercar rental for Dubai • 500+ vehicles • 4.9 ★ • Kamrad Finder • — Travel companion matching platform # • Local Deals Fundraising • — Digital coupon fundraising for schools & clubs • Benchmark Technologies • 2020 – 2022 • Health Safe Today • — India's digital health wallet • interoperable ecosystem • Nikshala • — Study-abroad guidance • Guruji AI chatbot • Android app # • Angular • NX • NgRx • RxJS • Signals • TypeScript • Storybook • Cypress • Docker • MEAN Stack Bhopal, India | Open to

Experience

Taazaa Inc

Senior Software Engineer

March 2024 - Present (2 years 2 months)

Noida

Leading frontend engineering for enterprise-scale Angular applications in the US healthcare and franchise industries.

- Architected a scalable NX monorepo housing 6+ Angular micro-frontends, reducing build times by ~35% through optimized caching and affected-build strategies.
- Led frontend development for ForSite (v2.2.29) — a dual-audience enterprise SPA for ForTec Medical serving hospitals and surgery centers across the USA; built on Angular 21, NgRx 20, standalone Signals, SignalR real-time notifications, JWT + MFA auth, and 40+ NgRx feature slices.
- Sole frontend engineer for the MARBLELIFE® Franchise Operations Portal — Angular 18, Nx 19, Signals-only state (zero NgRx/BehaviorSubject), Docker multi-stage build, Storybook, Cypress E2E, 7 role levels, and a published @marble-life-v1/drag-drop Nx library.
- Established a Storybook-driven component library adopted across 3 product teams, cutting UI inconsistency issues by ~50% in QA cycles.
- Introduced Cypress E2E coverage from 0% to 70% on critical user flows, significantly reducing production regression incidents.
- Mentored 4 junior developers through weekly code reviews and pair-programming; 2 were promoted within the year.

Skills: Angular · NX Monorepo · NgRx · TypeScript · Signals · SignalR · Storybook · Cypress · Docker · Agile

WebMobril Technologies

Senior Web Developer

May 2022 - March 2024 (1 year 11 months)

Noida

Delivered Angular frontends for 3+ client-facing applications serving 5,000+ active users across luxury automotive, travel, and community fundraising domains.

- CaiDrive — Premium luxury car rental platform for Dubai (500+ vehicles, 50+ brands including Ferrari, Lamborghini, Rolls-Royce, Bugatti). Built 8K global search, OAuth 2.0 SSO (Google & Apple), booking/reservation management, partner lifestyle discounts, chauffeur rides module, and admin dashboard.
- Kamrad Finder — Travel companion matching platform with subscription plans (\$30/\$125), algorithmic traveler matching engine, global destination catalogue, and real-time match notifications.
- Local Deals Fundraising — Digital coupon fundraising platform (replaces door-to-door sales) for schools and clubs. Built campaign dashboards, 90+ merchant deal system with single-use redemption, Google Maps merchant pinning, push notifications, and yearly renewal engine.
- Built and maintained a shared Angular component library standardizing UI patterns across all three projects.
- Defined team-wide coding standards, Git branching strategies, and Angular style guides — reducing code-review turnaround by ~30%.
- Onboarded and guided 3 junior developers; improved front-end code quality scores in SonarQube.

Skills: Angular · TypeScript · RxJS · MongoDB · Node.js · Express.js · MEAN Stack · OAuth 2.0 · Google Maps API

Bench Work Technologies

Full Stack Developer

March 2020 - April 2022 (2 years 2 months)

Noida

Full-stack development of 4 web applications across healthcare and EdTech domains using the MEAN stack.

- Health Safe Today — Mobile-first digital health wallet for India enabling patients to access health records on their phones. Built RESTful APIs and database layer creating an interoperable ecosystem connecting healthcare providers, laboratories, and pharmacies on a single platform.
- Nikshala — Study-abroad guidance platform for Indian students (Germany, Australia & more). Built step-by-step admission & visa roadmap, personalised university shortlisting, SOP guides, expert courses (German language,

TestAS), progress tracking, and integrated the Guruji AI chatbot. Published on Android Play Store.

- Redesigned a legacy dashboard's data-rendering logic, improving page-load performance by 45%.
- Implemented CI/CD pipelines via GitHub Actions and integrated payment gateways, SMS/email REST APIs.

Skills: Angular · Node.js · Express.js · MongoDB · REST API · TypeScript · SCSS · GitHub Actions · CI/CD

Plebiscite IT Services Pvt. Ltd.

Frontend Developer

October 2019 - February 2020 (5 months)

Noida

- Developed 5+ responsive, cross-browser UI modules in Angular with lazy-loading and route guards, improving initial load time by 20%.
- Translated Figma/XD designs into pixel-perfect components using TypeScript, HTML5, and SCSS — consistent rendering across Chrome, Firefox, and Edge.

Skills: Angular · TypeScript · SCSS · HTML5 · Figma · Responsive Design

MSS Infotech

Software Developer

January 2019 - September 2019 (9 months)

Bhopal

- Built and maintained PHP/MySQL web applications; first professional role establishing foundations in structured coding, database design, and software delivery workflows.

Skills: PHP · MySQL · HTML · CSS · JavaScript

Education

University Institute of Technology, RGPV

Bachelor of Engineering - BE, Information Technology · (June 2015 - June 2019)
